# On the Effectiveness of Cooperative Diversity in Ad Hoc Networks: A MAC Layer Study

---

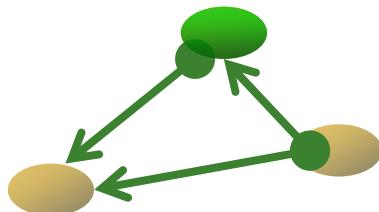

Haitao Zheng, *Microsoft Research Asia*

Yan Zhu, *Tsinghua University*

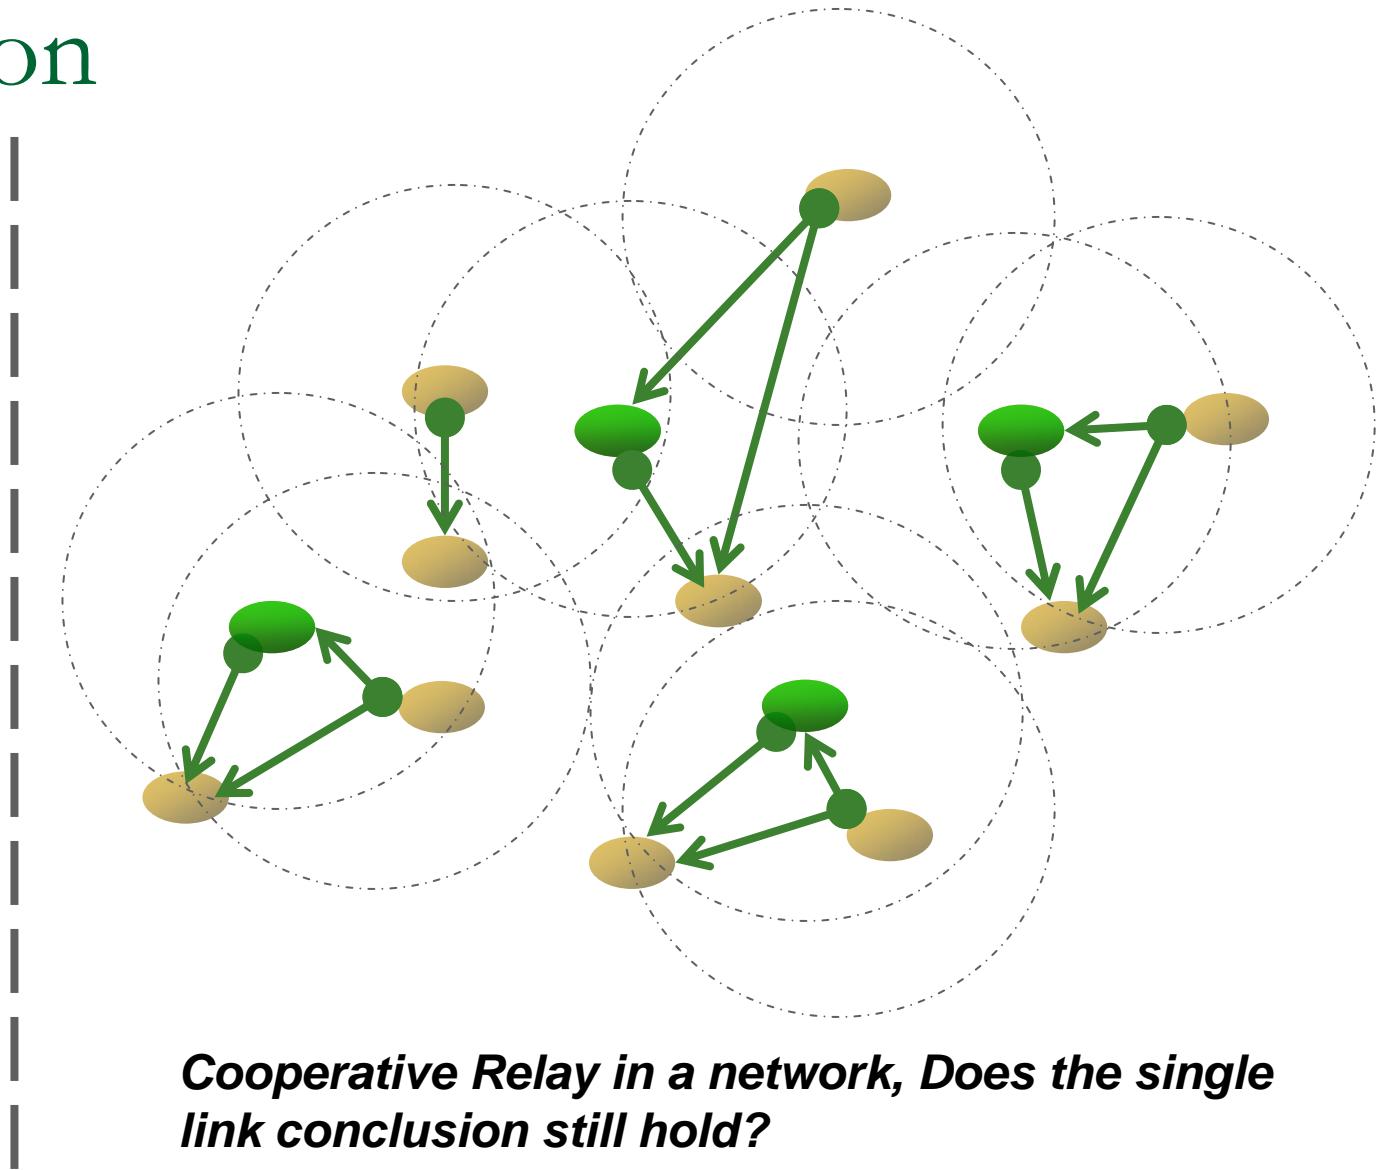

Cong Shen, *Univ. of California Los Angeles*

Xiaodong Wang, *Columbia University*

# Motivation

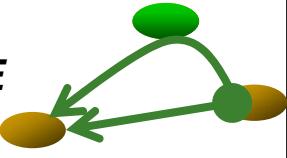

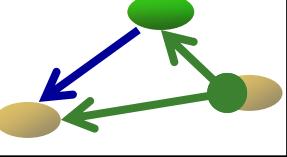

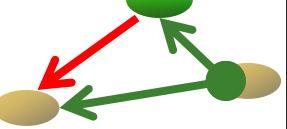

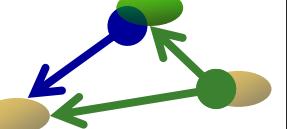

**Cooperative Relay  
for a single  
transmission  
Lots of Research!**

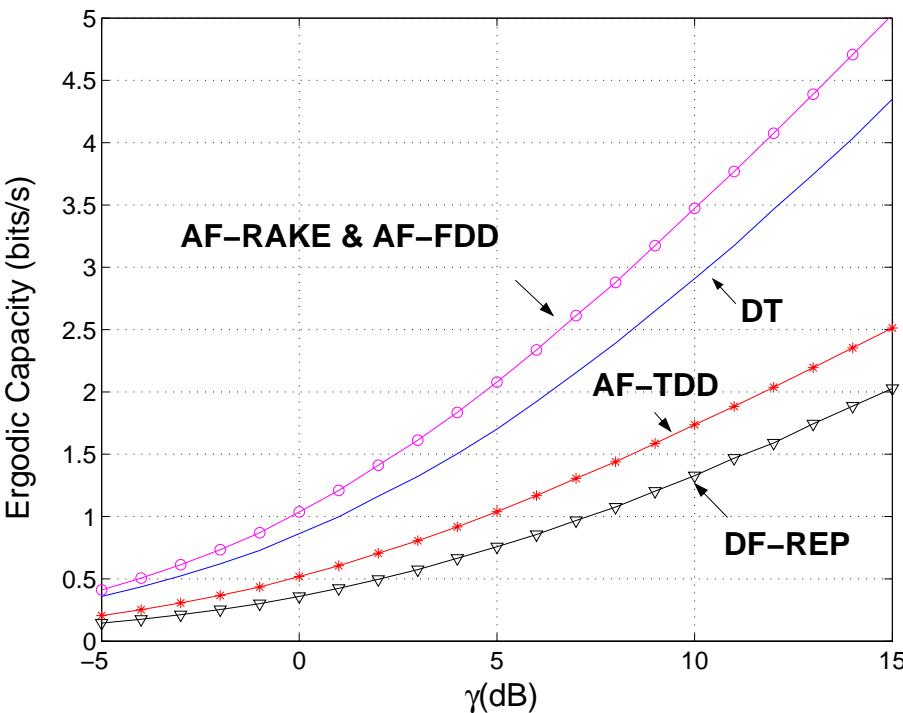

**Cooperative Relay in a network, Does the single  
link conclusion still hold?**

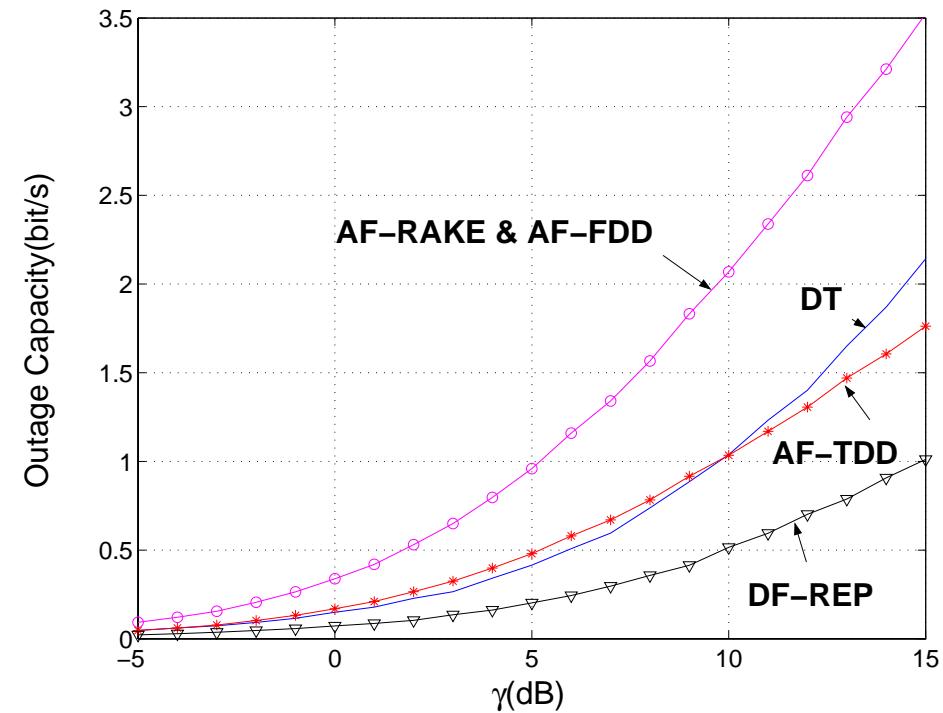

# Introduction to Cooperative Relay

<i>Cooperative strategy</i>	<i>Channel Usage</i>	<i>Time penalty</i>	<i>Theoretical capacity</i>
<b>Direct Transmission (DT)</b> 	1	1	$W \log(1 + \gamma  h_{21} ^2)$
<b>Amplified and Forward – RAKE (AF-RAKE)</b> 	1	1	$W \log(1 + \gamma  h_{21} ^2 + f(\gamma  h_{31} ^2, \gamma  h_{23} ^2))$
<b>Amplified and Forward – FDD (AF-FDD)</b> 	2	1	$W \log(1 + \gamma  h_{21} ^2 + f(\gamma  h_{31} ^2, \gamma  h_{23} ^2))$
<b>Amplified and Forward – TDD (AF-TDD)</b> 	1	2	$\frac{W}{2} \log(1 + \gamma  h_{21} ^2 + f(\gamma  h_{31} ^2, \gamma  h_{23} ^2))$
<b>Decode and Forward – REP (DF-REP)</b> 	1	2	$\frac{w}{2} \min \left\{ \log(1 + \gamma  h_{31} ^2), \log(1 + \gamma  h_{21} ^2 + \gamma  h_{23} ^2) \right\}$

# Single Link Performance

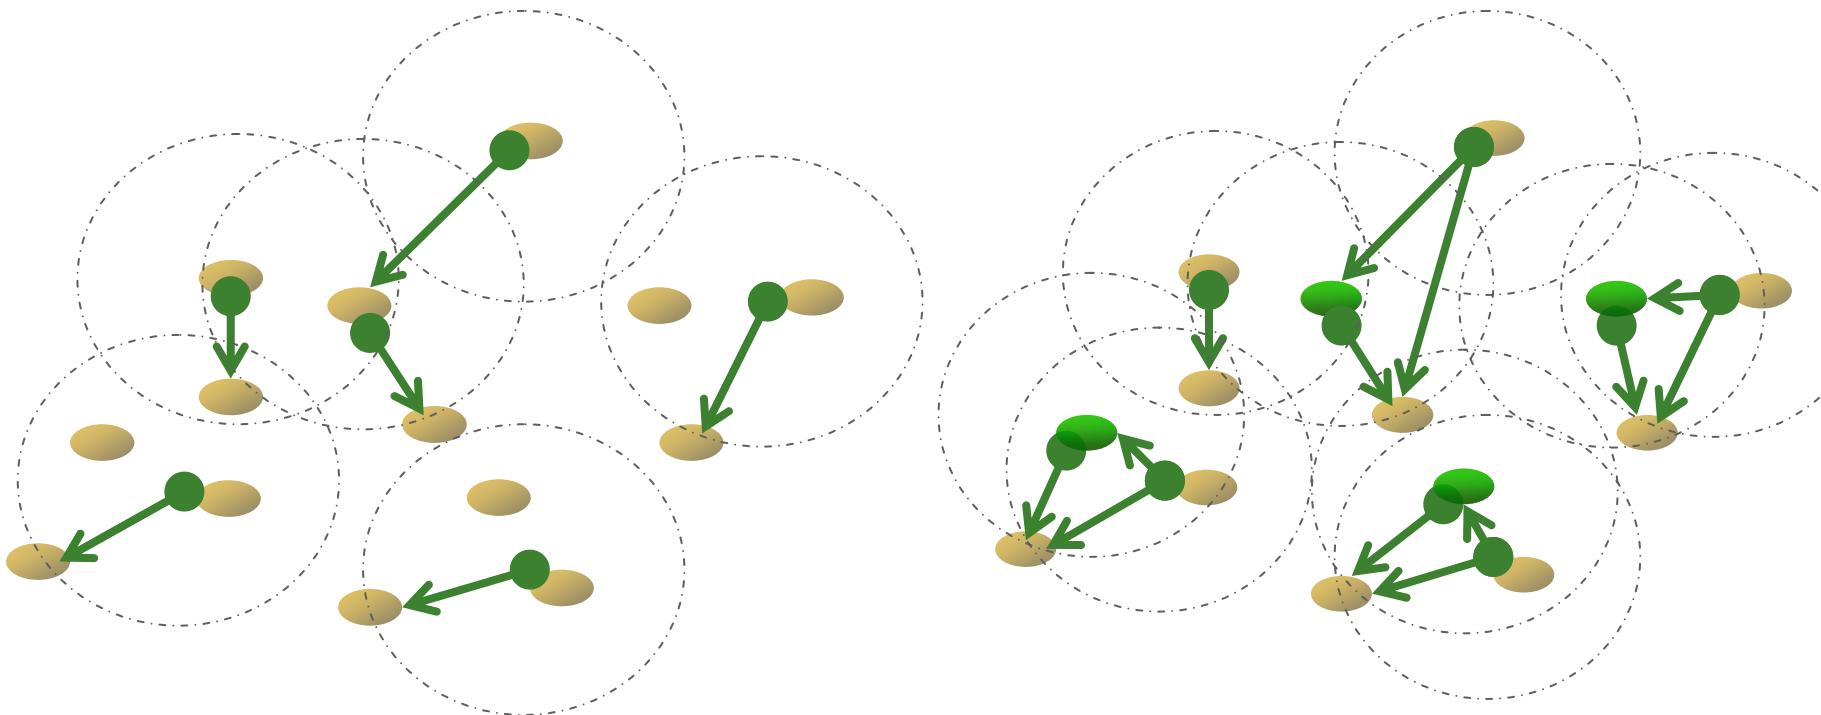

Ergodic Capacity

Outage Capacity (10%)

# Interference Does Matter!

***Direct Link in a network***

***Cooperative Relay in a network***

# Relay Interference Management

## *Relay Selection*

*Src sends out solicitation request,  
Neighbors respond with self-condition  
Select the relay with*

- *Minimum Distance*
- *Minimum Load*
- *Minimum Interference*

## *Decide Strategy*

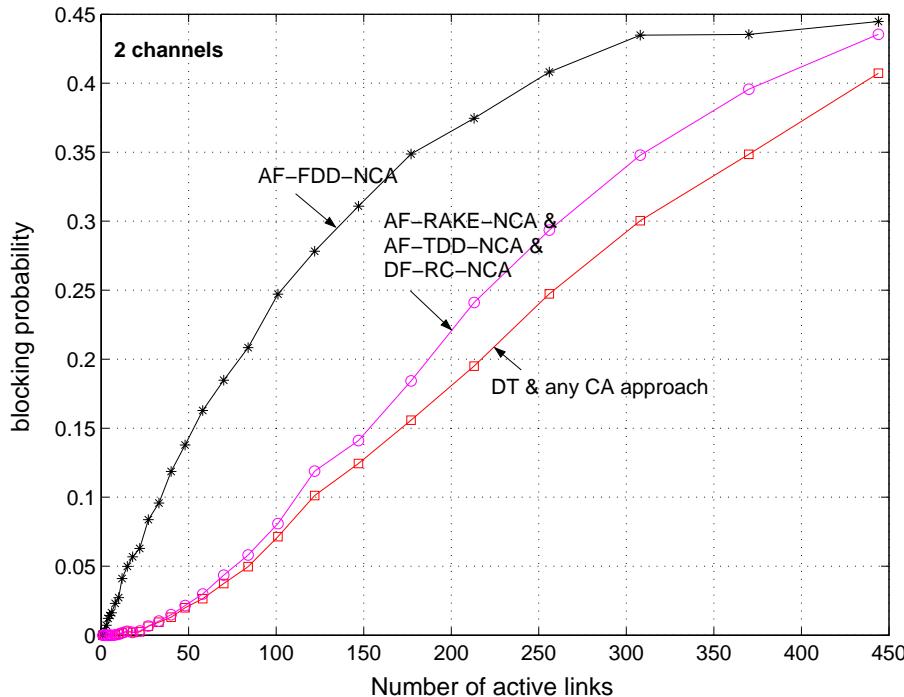

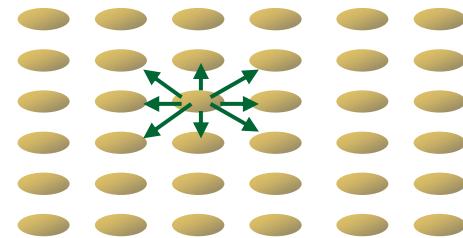

*Depend on hardware (full/half duplex)  
& Resource condition*

## *Resource Contention*

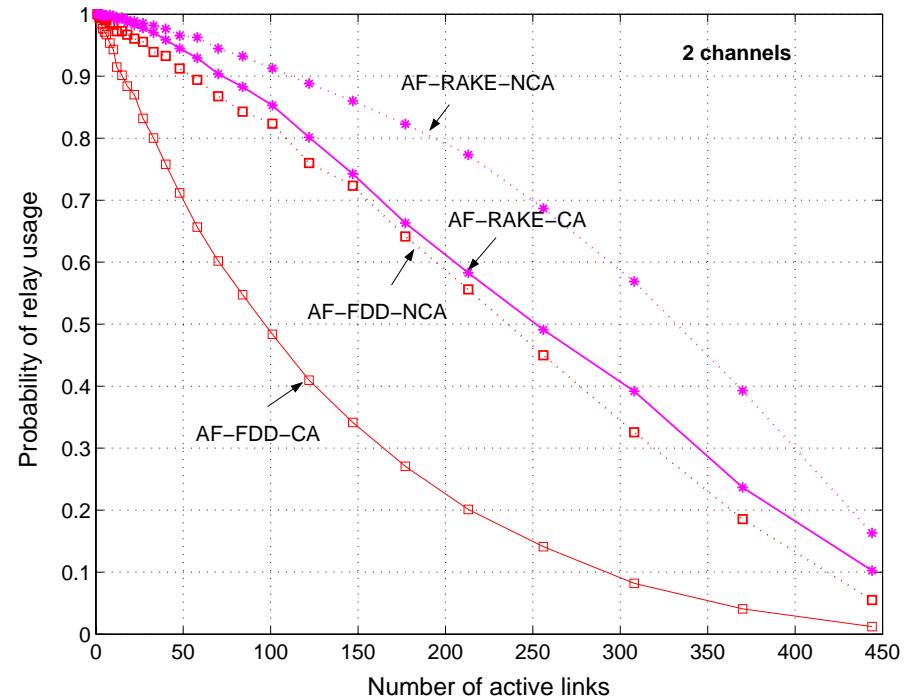

*Compete for Channels for both direct &  
relay links*

- *Cooperative: direct first, relay later*
- *Noncooperative: direct+relay*

# System Statistics

*Blocking Probability*

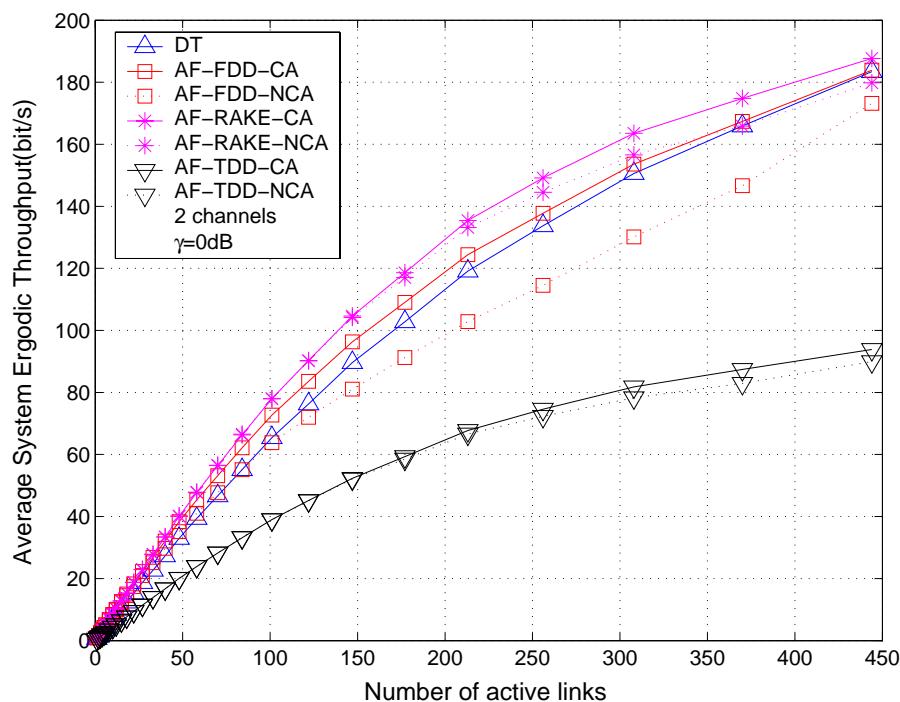

*Relay Usage*

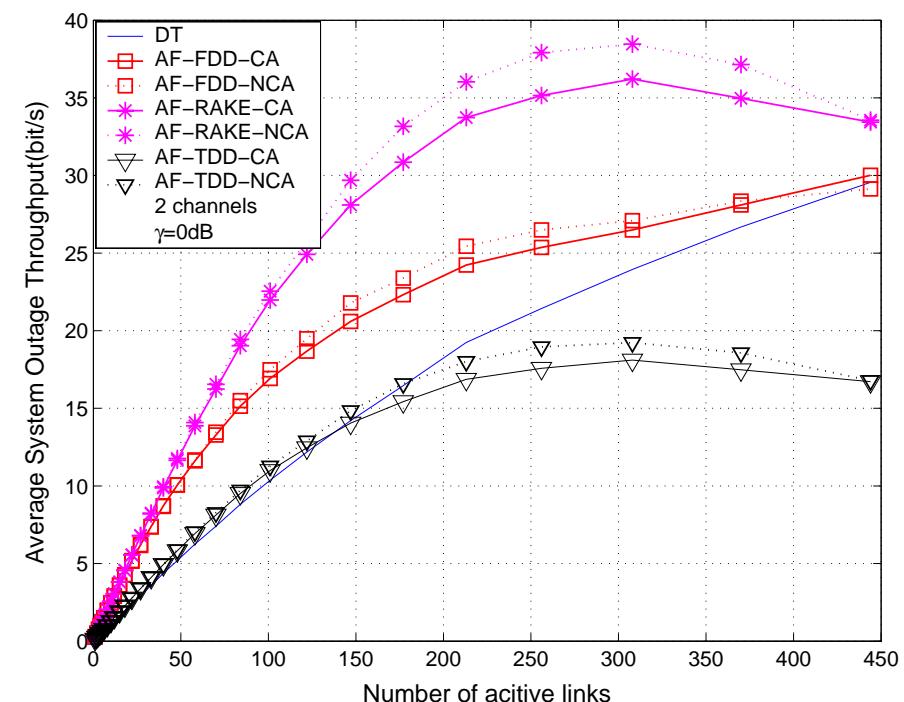

Selfish relay usage leads to higher blocking

Selfish relay leads to higher probability of relay usage

# Average Link Capacity

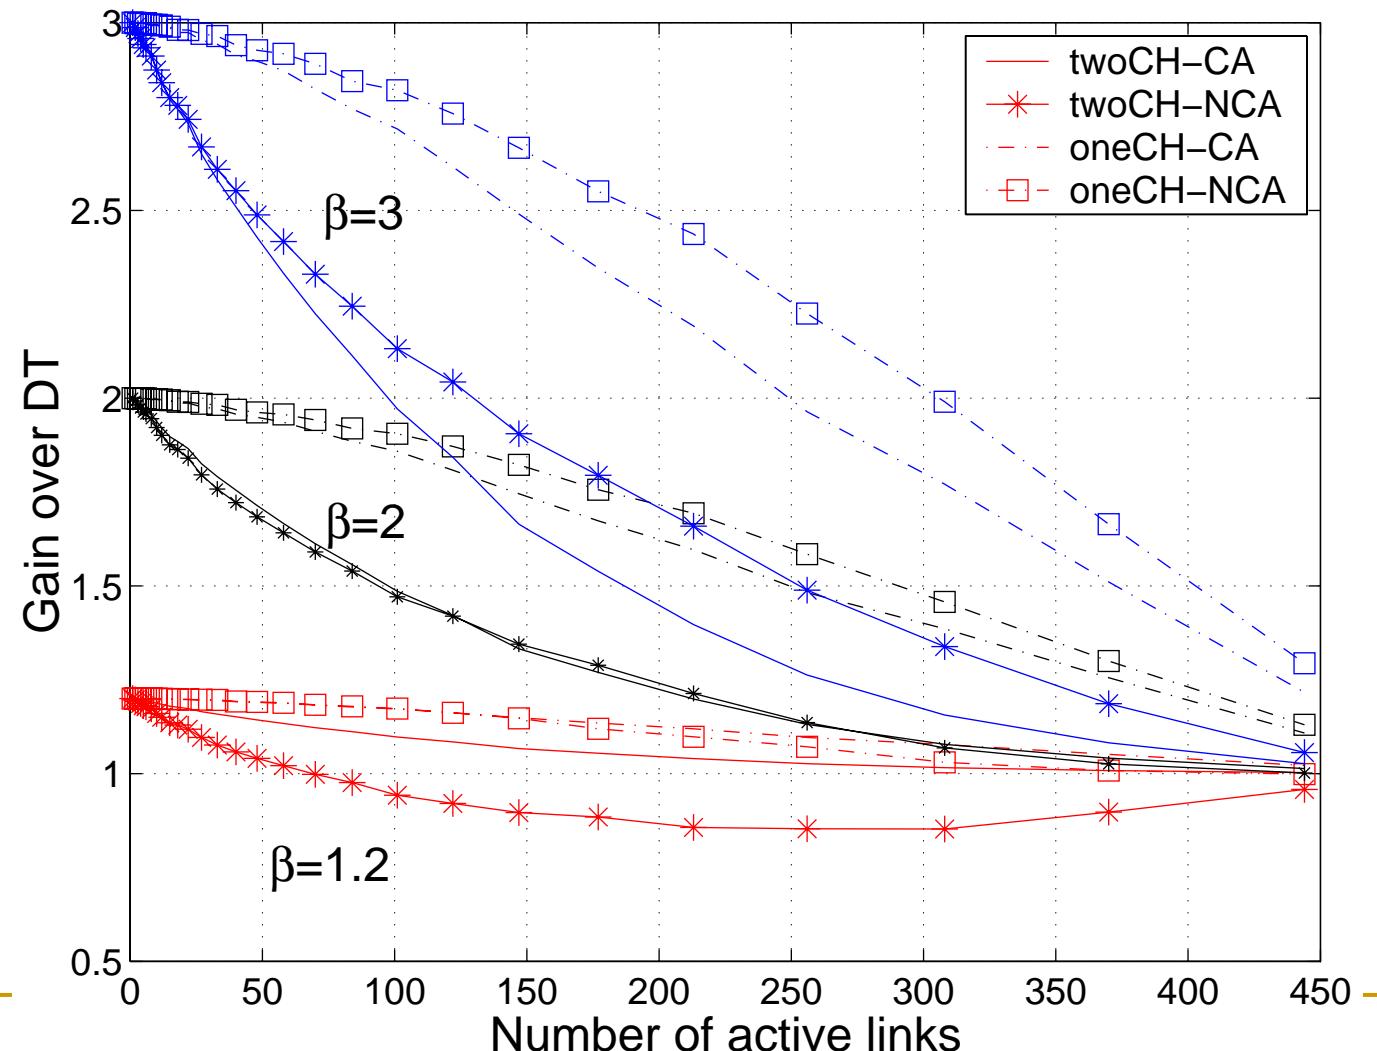

Ergodic Capacity

Outage Capacity (10%)

# Impact of Cooperative Link Gain

# Conclusion and on-going work

- Cooperative Relay in an Interference Limited Environment
- Careless/selfish usage of cooperative relays yields higher connection blocking probabilities
- Interference Management
- Extensions
  - Random topology
  - Theoretical analysis
